A photograph of a garden patio. In the foreground, a large wicker sofa with light blue cushions is positioned on a brick-paved area. To the left, a building with a series of arches and columns is visible, with green vines climbing up its side. In the background, there are more wicker chairs and a small table, surrounded by lush greenery and trees. The overall atmosphere is peaceful and inviting.

# THE STORY OF APPLE BEE

FOR THE REAL  
LOVERS OF LIFE

Apple Bee is more than a garden furniture brand, it's the ultimate contribution to your leisure time. That's why we call it '**pleisure design**'; we combine **pleasure** and **leisure**. How we do that? By making sure that you can optimally enjoy your free time with the help of our furniture, because we know how valuable your time is. If you can enjoy yourself to the fullest, that will make us happy! Since 1998, we have already been able to make a lot of people happy with our garden furniture, with more smiling faces every day! That motivates us to use our creativity and skills to keep making beautiful garden furniture for you, a lover of life with an eye for beautiful things. *That is our passion, that's who we are. We are Apple Bee!*

FROM WICKER-  
WORK SPECIALISTS  
TO LEISURE TIME  
CRAFTSPEOPLE

# PLEASURE DESIGN

## Quality

We like to share our passion, because it inspires and motivates. That is why at Apple Bee we work with professionals who always put their best foot forward. This is reflected by the quality of our furniture. For our wickerwork furniture, we have been working together with craftspeople in Indonesia for decades, because wickerwork is pure craftsmanship there, and we only trust the specialists to do the best job. In Indonesia, this craft is a tradition, and the wickerwork specialists share our passion for beauty and quality. They make our designs come to life in the best way. We are actively involved in the production process, from start to finish, and you can be sure that you are buying a quality product, which you will be able to enjoy for years!

## Our unique Biculair® wickerwork

How long the lifespan of a product is, depends on the materials you use. Since this is so important, we have invested a lot of time and energy into our own brand of wickerwork, Biculair®. This rotan look-a-like is made of HDPE. The advantage of this type of wicker is that it is weatherproof and colourfast. And it's recyclable, so it's eco-friendly.

## Our Bee Wett® cushions

The ease of use of garden furniture increases by a lot if you don't have to keep running back and forth to the garden shed with the cushions for every drop of rain. That's why we made the Apple Bee garden furniture with our Bee Wett® technology.

The fabric is waterproof, UV resistant and comfortable. The filling is made in such a way that water is guided through the fibres, and drained through an open-structure drainage at the bottom of the cushions. This way, you can prevent moisture from staying behind in the cushion, where it will cause mould. All facets of the cushion are focused on making sure you can get comfortable again in no time after heavy rain!

## Only the best materials

Choosing quality means choosing the best materials. We think that goes without saying. That's why we use high-quality aluminium, firm rope wicker cord, our recyclable Biculair® wickerwork and the comfortable Bee Wett® cushions. The teakwood that we use, grows in sustainably managed and controlled plantations, and it is certified. So if you buy Apple Bee garden furniture, you are making a sustainable choice. We put all of these high quality ingredients together to make our innovative furniture, with unique and unconventional Dutch Design.

**Because this is exactly what drives Apple Bee: putting the quality in your quality time!**

**COMBINING PLEASURE AND LEISURE INTO

# DUTCH DESIGN

The Apple Bee collections clearly show that the furniture is made with passion. The designs are part of the Dutch Design tradition, and they clearly reflect the keywords **minimalistic, experimental, innovative, unconventional, and a sense of humour. No baroque excess, but to-the-point and pure.**

The design is focused on the goal, the function. With the right mix of materials, an Apple Bee design will never be too impersonal and strict. The play of lines and the materials make the furniture truly unique. Apple Bee garden furniture will be a joy to behold for many years, because pure design quality is *timeless*. Take our Cocoon lounge set with its beautiful round curves; it was already beautiful in 2005, and over 15 years later it still is.

The **craftspeople** who make Apple Bee garden furniture, make sure that the materials are used in the correct way. This takes a lot of time and attention. The development and design team develops new materials and is constantly looking for new applications of existing materials. For example, over 20 years ago there was a high demand for a sustainable version of rotan patio chairs, since rotan ages relatively quickly. Apple Bee's development and design team made a synthetic Biculair® wickerwork; a rotan look-a-like that is recyclable and has a long lifespan. An innovation that has become an essential part of the world of garden furniture.

Apple Bee garden furniture will invite you to come and enjoy the beautiful things in life. That's what it was made for, with love and devotion.

# ANTIGUA SUNBED

*M a d e   f o r   e a s e   &   c o m f o r t*

This adjustable lounger has three reclining positions, and it also offers the option to recline fully. On one end of the lounger there are two wheels so you can move it easily, properly hidden so as not to impact the design. Quality, comfort and beauty are all combined in the design of this lounger. The teak has a coastal finish, giving the wood a beautiful 'beach' look.

# DINING IN STYLE

# DESIGNED FOR HAPPY MOMENTS THAT LAST

---

We believe that life should be celebrated. Because what can be better than sitting around the table in the garden with your friends and family on a beautiful summer evening, enjoying a nice barbecue and some beverages? Or reading a book with the sun shining on your face, in that comfortable lounge? Those moments of joy, that's what we're here for!

Your garden is the ultimate place to enjoy life without being disturbed. The atmosphere is up to you. Sleek and modern design or cheerful and playful design, there is something for everyone in our wide range.

# R O P E

For some of the furniture, Apple Bee uses 'rope' as a material for wickerwork. This is mechanically produced rope, with a PVC core. Sustainable waterproof fibres are twisted around it, that feel soft to the touch. As a result this 'rope' offers the best of two world: solid quality with little stretch, with a soft and comfortable touch.

| JAKARTA DINING ARM CHAIR BLACK | JAKARTA DINING  
ARM CHAIR GREY | JAKARTA DINING TABLE ROUND

# JAKARTA DINING

The Jakarta dining chairs are available in four different colours. Understated Black or Grey for a balanced, calm atmosphere. Would you prefer something in a more vibrant colour? Then you should go for Lemon or Olive.

THREE SEATER | LA CROIX CORNER | LA CROIX COFFEE TABLE TEAK

# LA CROIX DINING

A striking detail is the way the black lengths of rope are woven through the natural wooden frame. This gives the La Croix an open appearance. The solid rope guarantees that familiar Apple Bee quality, and thanks to our Bee Wett® cushions you will be extra comfortable.

LA CROIX DINING ARM CHAIR |  
CONDOR DINING TABLE

# BEE WETT® TECHNOLOGY

## **Washable**

Apple Bee furniture is made of true quality materials, this especially applies to the cushions. Our Bee Wett® series consists of special weatherproof cushions that you can leave outside. The covers can be removed, and they are made of a solid, comfortable fabric that is washable.

## **UV-resistant**

The cushion covers are made of special Olefin fabrics, that are water repellent, abrasion proof and strain resistant. Furthermore, they are not vulnerable to decolouration in the sun. And all of these technical benefits don't negatively impact the comfort level, because the fabrics are very soft and comfortable to sit on. Quality meets comfort!

## **Quick drying**

Unlike the standard foam that is used in other cushions, the unique Bee Wett® filling does not absorb moisture, because of the open cell structure. With this technology, water is drained downwards, so you won't have to worry about the mould forming in the foam. Because of this special technique and the water repellent fabric, your cushion will be dry in no time!

## **Perfecte drainage**

To prevent water from staying behind underneath the pillow, Bee Wett® cushions have a special drainage system at the bottom. Moisture is drained perfectly through an open fibre structure, so that the water comes out at the bottom. You will never have to worry about sudden rain again!

## **BEE WETT IS THE BEST YOU CAN GET**

Good maintenance will extend the lifespan of your Bee Wett® cushion. Below, we have a few tips to help you.

If any dirt or fluid was spilled on your cushion, brush it off right away, before it can be absorbed by the fabric. If you don't use your cushions for an extended period of time, for example during the winter, make sure to store them inside so they don't get dirty. Did your cushions get dirty after all? Let the cushion covers soak in soapy water, or wash them at a maximum of 30 degrees. Never use aggressive or corrosive cleaning agents. Always rinse the covers properly with clean, lukewarm water, so that the water repellent layer won't be damaged. You can also protect this layer by adding a little Harmisol to the last rinse.

Furthermore, it's important to not put your cushion covers in a centrifuge or dryer, and that you don't iron them, to maintain the natural elasticity. Once the washing cycle is finished, put the fillings of the cushions back into the covers right away. The covers will dry neatly around the cushions.

# FRÉJUS DINING

The Fréjus has a summery look. Everything about this collection is light, cheerful and natural. At the top of the frame, the wooden connections are visible in a stylish way. Also good to know: the brace at the back of the dining chair is made of **stainless steel**.

# CUT FROM THE RIGHT WOOD

**At Apple Bee, we like craftsmanship. That's why we have years of experience with teak. We use certified teakwood from sustainably managed and controlled plantations.**

Because teakwood contains many oils, it's one of the most sustainable types of wood available, so it's very suitable for outside use. Aside from that, teakwood helps create a friendly and warm atmosphere. Sometimes we use standard teak, and sometimes we give the wood an additional Antique or Coastal colour finish. The Antigua collection on the picture next to this text has the Coastal finish, for example.

## **From brown to grey**

When you purchase a new natural teak set, the tropical hard wood has a honey brown to dark brown colour. Depending on the environment and the weather conditions, the wood will naturally become grey. This will create the characteristic silver-grey patina colour, which is the reason why a lot of people choose teakwood.

## **Climate and maintenance**

How long it will take for your teak furniture to become grey, depends on the weather circumstances. If the weather is very moist and wet, in combination with a lot of sun, teak will become grey after a few weeks. If the weather is dry, it will take a few months longer.

While teak becoming grey is a natural process, we advise you to treat the teakwood with Apple Bee Teak Shield. This will help you keep the silver-grey colour looking beautiful for as long as possible, and it will prevent green scale.

**For more maintenance tips, check the pages 62 – 65.**

# CLEANING YOUR TEAK SET

Over the years, your teak furniture will deal with a lot of different types of weather. In order to keep them in optimal condition, it's essential to clean and maintain the teak. We advise you to do this at least three times per year, and treat your furniture with the special Apple Bee teak maintenance products.

## How do I clean my teak set?

You can clean your set with the special Apple Bee Teak Cleaner, developed to remove mould, (green) scale and other kinds of grime. Start cleaning by moistening your teak furniture with clean lukewarm water and a soft sponge. Then get the Teak Cleaner. Always read the instructions first, and shake the product properly before use. Before you start, protect your eyes and hands and cover the area, for example with disposable plastic.

Put some Teak Cleaner on a soft cloth, and rub it thoroughly but gently on the teakwood. Leave it on for three minutes, and then clean it properly with a steel wool sponge. Once you have cleaned the furniture thoroughly, you can rinse off the Teak Cleaner with clean water and a soft sponge. Finally, let the furniture dry and voilà; your teak furniture is clean!

## When do I have to clean my teak set?

### *Start of spring*

When the winter months are over, it's time for spring cleaning! A lot of people will be using your teak set again, so this is a good time to get rid of dirt, for a fresh start in the spring.

### *In between*

By the time summer comes along, your furniture has been through a lot of different we-

ather circumstances. That's why this is a good time to refresh the furniture for the rest of the season.

### *Start winter months*

When the days of warm weather come to an end, it will be time to put your set in storage for the season. You don't have to, of course. On cool winter evenings, you can still enjoy your teakwood and have a nice hot beverage. Whether you put your set in storage or not, do clean the furniture, so it will be fresh for the winter.

## Do I need to cover my teak set in the winter?

Apple Bee teak products are made to leave outside, but if you do want to use a furniture cover to stop them from getting dirty, you can. We do want to advise you **not** to cover your furniture for too long. This may result in condensation, so that the teak won't be able to "breathe", and the wood may start to mould. Of course you want to avoid that. That's why we recommend not to cover teak for too long, but rather clean it properly at the start of spring. On the other hand, you **should** put the cushions inside for the winter, so they won't get dirty.

“WE ADVISE YOU TO TREAT YOUR GARDEN FURNITURE BEFORE PUTTING IT IN STORAGE FOR THE WINTER, AND AT THE START OF SPRING, WHEN THE FURNITURE WILL BE USED A LOT.”

# HOW DO I MAINTAIN MY TEAK SET?

Once you have cleaned the teak properly with our Teak Cleaner, you can use Apple Bee Teak Color Restore or Teak Shield to keep the teak looking beautiful. Cleaning teak will take some time and effort, and these maintenance products will help you slow down the process of the furniture getting weather-beaten again.

## Our pre-treatment

Apple Bee has pre-treated your teakwood furniture with antifungal agent during production, which will provide some protection against mould.

Furthermore, we have various products in our range to help you keep your garden furniture in good condition. All of our maintenance products are made on a water base and are 100% biologically degradable, so they won't harm people or the environment. And once you have treated your furniture with our products, you will be able to leave it outside, because it will be protected against sunshine, rain, and snow!

## Teak Color Restore for Antique or Coastal finish

The ultraviolet rays of the sun will damage the colour finish Antique and Coastal. This process can be delayed by treating the teakwood with Apple Bee Teak Color Restore Antique or Coastal (depending on the colour finish of your set), which contains unique UV absorbers and reflectors. Apple Bee Teak Color Restore will protect your teak from becoming black or grey the whole season long!

When **applying** this product, we advise you to use a lint-free cloth and apply a thin layer. Don't use a sponge or a nozzle, because then the layer may be too thick, and after a while this may cause light tears.

If you want to **remove** the Teak Color Restore, you can do this by sanding the furniture, but this will take a lot of time. That's why we recommend to always apply the product to a small area first, so that you will be able to see if it meets your expectations!

## Teak Shield for maintaining the grey colour

Would you like to maintain the natural silver-grey colour of your set? In that case, we recommend the Apple Bee Teak Shield.

The elements of this maintenance product have water and dirt repellent features. This makes it ideal to **protect** your furniture from algae and mould. And you will be able to keep the grey colour looking beautiful.

Apply the Teak Shield, according to the instructions, with a soft lint-free cloth, and make sure that the teak is **100% dry**. Next, leave it on to be absorbed by the wood. After 4 hours of drying, apply a second layer and let the furniture dry for 24 hours before exposing it to the weather.

An **annual treatment** with Apple Bee Teak Shield should be enough, unless the furniture is exposed to moisture for an extended period of time and a green layer forms on it: in that case you can apply the product twice a year. If you want to use Teak Shield on **new teak**, leave the furniture outside for a week first. If you want to **remove** the product, you can do so with our Teak Cleaner.

Would you like to know more about the different teak products of Apple Bee? We explain it in detail in our [teak maintenance guide!](#)

ROYAL COMFORT  
WITH OUR

# OLIVE LOUNGE

The teakwood of this royal lounge set is made with a special finish - **'white washing'**. This wood finish technique is based on an old phenomenon, where wood was treated with chalk because of its disinfecting effect. During the whitewashing process, the chalk is absorbed deep into the veins of the wood, which has a beautiful, bleached effect. The Olive lounge set is solid and rugged all over, and it will fit the atmosphere of your garden perfectly. The images show you an example in beautiful shades of green.

A woman in a bikini is running on a pebble beach, carrying a long, flowing blue veil that trails behind her. In the foreground, there are two lounge chairs with white cushions. The background features a steep, rocky cliff under a bright sky with lens flare effects.

# BEACH VIBES

## **COCOON THROUGH THE YEARS**

The Cocoon has been a part of our collection since 2004, and over the years it has had many different looks. Below, you can see the 2004 version. In 2018, the design was refreshed and it became the Cocoon we know now, with its 20 mm (!) thick Biculair® wickerwork (see page 98 – 105). Cocooning is still the basic concept behind this design. And in the Cocoon Daybed two people can cocoon together, because this product has a diameter of no less than 220 centimetres! A nice detail in the 2018 version, is the incorporated rope, which makes it easy to move. The Cocoon is still one of our favourites!

# TURN OUTDOORS INTO INDOORS

**It's a worldwide trend to turn the garden into a sort of second living room. We are spending more and more time in our gardens, so we want to make the garden just as comfortable as our living room.**

Whether you have a canopy or prefer to sit under the open sky: turning outdoors into indoors is a trend that will definitely make you enjoy your space even more.

We all have to stay home because of corona, and a lot of us started renovating our homes. Due to the necessity to stay at home, we finally had time for that. And because we couldn't go on holiday, we discovered the garden as the ultimate place to relax. Indoors and outdoors became mixed: massive exotic plants were put indoors, and big furniture was placed outdoors. Apple Bee furniture is so beautiful and luxurious that it would also look great indoors!

Do you want to blur the lines between indoors and outdoors? Try mixing colours and materials for indoors and outdoors. Don't forget the accessories, because they will give your atmosphere the finishing touch. The design of Apple Bee furniture is so beautiful and comfortable that you will be able to put your items anywhere you want; in the garden, living room or conservatory, or on the balcony. They will definitely make you feel *comfy* at home.

ALWAYS COMBINING  
THE BEST MATERIALS

# WICKER & ALUMINIUM

For years now, Apple Bee has been a wickerwork specialist, but by now we are true 'leisure time craftspeople'. With our wickerwork furniture, we always aim for innovation: new looks, new wicker types, and unique designs. The mix of materials of wickerwork and aluminium is used in multiple Apple Bee collections, and it's very popular. Quality and design are professionally combined.

# MILOU DINING BLACK

Apple Bee's drive for innovation is also how the colour 'Willow' of the Biculair® wickerwork was created for Milou. This unique colour combination is a blend of light and dark brown colour shades. The wickerwork is combined with black aluminium. You can sit comfortably on the soft Bee Wett® cushions. The dining table is available with a teak tabletop with Antique colour finish or with a light concrete (LWC) tabletop. With an amazing length of no less than 240 centimetres, you don't have to worry about not having enough room to accommodate your guests, everyone can enjoy this dining set.

# TREND: WHITE GARDENS

This trend has been around for a while, and we can already see it making a comeback this year. A light look in your garden is a classic that is never out of style, because the light white shades are so easy to combine. By combining it with other light colours you can create a chic look, and with contrasting colours you can make bold combinations. This picture shows how the stylish white Milou furniture is a point of calm in a vibrant 'wild garden' with its beautiful green and purple oasis of colour.

# ROPE AND BELT & ALUMINIUM

WITH TEAK DETAILS

By combining rope and belt, Apple Bee has developed a new wicker structure. With the round "rope" chain and the flat "belt" weft, an interesting play of lines is created. The way in which the round "rope" chain is woven through and around the frame is truly masterful.

## PERFECT COMBO:

### TAUPE & COASTAL

The latest addition to our 2021 collection: the **Sticks and More lounge**. A harmonious combination of materials and colours gives this set its unique appearance. The frame is made of aluminium in the colour taupe, which creates a perfect match with the coastal finish of the teakwood. As if they were made for each other. The most striking detail is in the back, where tubes in the frame help dry the back cushions. This design is part of the Japandi style: Japanese mixed with Scandinavian. A style with a subtle natural rest, which fits the current time perfectly.

## L I G H T W E I G H T C O N C R E T E

'Concrete' and 'lightweight' are rarely spoken in the same sentence, unless you are talking about our lightweight concrete! Not only is the name accurate, the quality is perfect as well. The inside and outside of our concrete tabletops are made of concrete, fortified with composite and magnesium. Thanks to the magnesium, the concrete is light yet strong, and the PU composite makes the tabletop water repellent. As a result, the tabletop can withstand virtually all weather conditions. It's even been tested at temperatures as low as -15 degrees Celsius! You don't have to worry about spilling something, as you can simply wipe it off instantly with a sponge and lukewarm water! Our Light Weight Concrete tabletops are made with a stylish pattern.

# MENTON LOUNGE

MENTON LOUNGE CHAIR | MENTON SOFA THREE-SEATER  
| MENTON COFFEE TABLE SET OF 2

# ALUMINIUM

Our Delgado Lounge is fully made of aluminium. This stylish set has a beautiful Silver Grey finish, which gives it a cool but luxurious appearance. We always use aluminium for the basic frames of our furniture, because it is lighter than steel and hard-wearing. For wickerwork furniture, our Biculair® wickerwork thread is woven around the aluminium frame. We produce the aluminium frames ourselves. That way, we can always determine the ideal tube and shell thickness. So that we can guarantee the Apple Bee quality that you're used to!

# ZARA DINING BLACK

Our Zara Dining collection is special in multiple ways. The way in which the Biculair® wickerwork thread is 'knotted', so to speak, in combination with the open details in the back, gives this collection a refreshing and unique appearance. Here, the Zara Black chair is combined with the square Jakarta table, a setup that is perfectly suitable for small spaces. But in a larger setup, the Zara White chairs will look just as elegant with our Joie de Vivre dining table. That is the strength and versatility of the Zara collection, which is also stackable.

## APPLE BEE FURNITURE IS EXPORTED ALL AROUND THE WORLD

Het is een eer voor ons als tuinmeubelmerk om te zien dat ook hotels, restaurants en andere vrijetijdsbestemmingen kiezen voor onze Apple Bee meubels. Des te leuker dat wij daarvan mooie foto's krijgen om met jullie te delen. Zo kun je zien op welke schitterende locaties onze meubelen staan te stralen!

## Escarpa - The Madeira Hideaway, Portugal

The beautiful pictures of Hotel Escarpa in Madeira, Portugal, really took our breath away. Both inside and outside, this beautifully located hotel is using our Juul chairs, predecessors of our Luc collection, and they're also using our Robinson Daybed. Who doesn't want to wake up to a view like this? Sign us up!

# P O R T U G A L

# MONTENEGRO

## Restaurant Higo, Montenegro

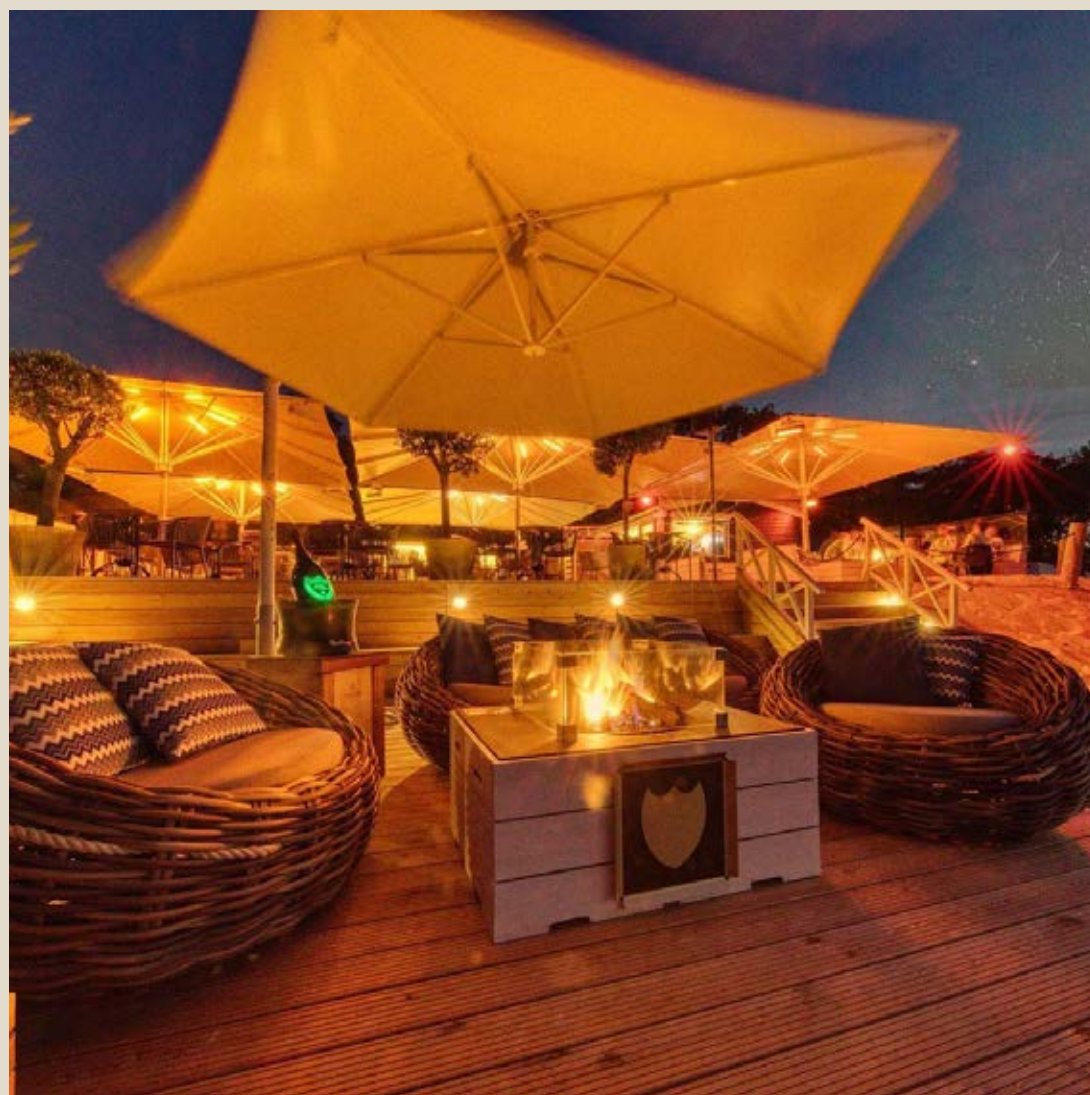

This lovely restaurant in Montenegro is full of Apple Bee furniture. The Del Mar collection (predecessor of Fréjus) is used for both the dining area and the lounge area. The white chairs on the terrace are our Heritage dining chairs, made of aluminium! A great example of Apple Bee furniture made upon request. They're also using our Twiggy tables in a playful way here, among the trees. Dining with a beautiful view! It makes us happy to see these sunny pictures, and we hope that a lot of people will come to enjoy our furniture in restaurant Higo.

For large projects, we will make a special design or customised version upon request, as you can see here with this Fleur armchair, from a previous collection. More proof that you can combine our Soul tables with everything!

## Buddelbar Timmendorfer Strand, Germany

In the far north of Germany, you will find this special version of our Cocoon Lounge! The Cocoon collection originally comes with green cushions and wickerwork in a lighter colour, but for this project we designed these special colours. We think the Cocoon looks beautiful in this trendy beach bar, and we'd love to relax here all day long!

# GERMANY

# around the **WORLD**

Our furniture is travelling all over the world. Because of our worldwide network of dealers, we frequently see our furniture in the most beautiful places. Join us on our journey to explore where Apple Bee furniture is used. Our collections have reached their goals: they're with our customers, who will be able to enjoy our furniture for a long time to come!

## JUNGLE GARDENS

**Gardentrend:** it's very inspiring to see how creative people all around the world go about furnishing their outdoor areas with our Apple Bee furniture. One of the trends that stands out is the jungle look. You really don't have to live in the jungle to achieve this look, these pictures from Homeofmylife in Germany and Sannsinterior in Norway prove that. With a lot of plants and cosy ornamental cushions, you can turn a city garden into a green oasis.

Apple Bee also has its representation in Norway! With the Air White Alu from our previous collection, Anette Greve created an intimate little corner, with a view of a beautiful lake. It's always idyllic here; in the morning you can watch the sunrise, in the afternoon you can drink a cup of coffee, and in the evening you can take a moment to think about your day. Speaking of happiness!

# CALMING & RELAXING

## Milou Dining & Lounge

We have seen the Milou in a lot of countries already! The Milou is seen in Australia, Thailand, Poland, Ukraine, and now even spotted here in Denmark. The lounge set and the dining set are shining here next to this beautiful villa, combined with the Joie de Vivre dining table and the Soul coffee table set.

Denmark

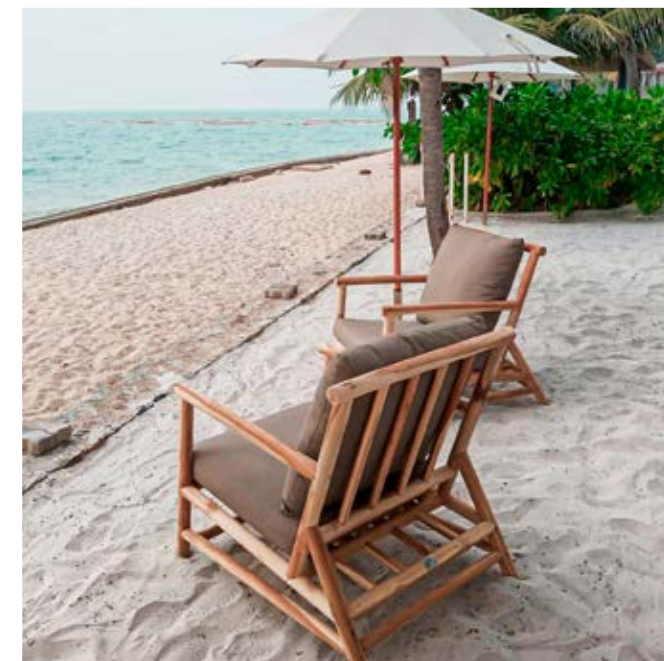

## FROM PEACEFUL VILLAS IN DENMARK TO TROPICAL BEACH HOUSES IN AUSTRALIA

### AVALON BEACH, NEW SOUTH WALES

From Denmark all the way to the other side of the world: our Milou White is going down under! We definitely wouldn't say no to a holiday in Ava Cliffhouse in Australia. The white Milou looks perfect with the white interior and exterior of this beautiful beach house, so we recommend this collection if you love the colour white!

# COLOUR PALLETS OF THIS SEASON

## TRUST COLOURS

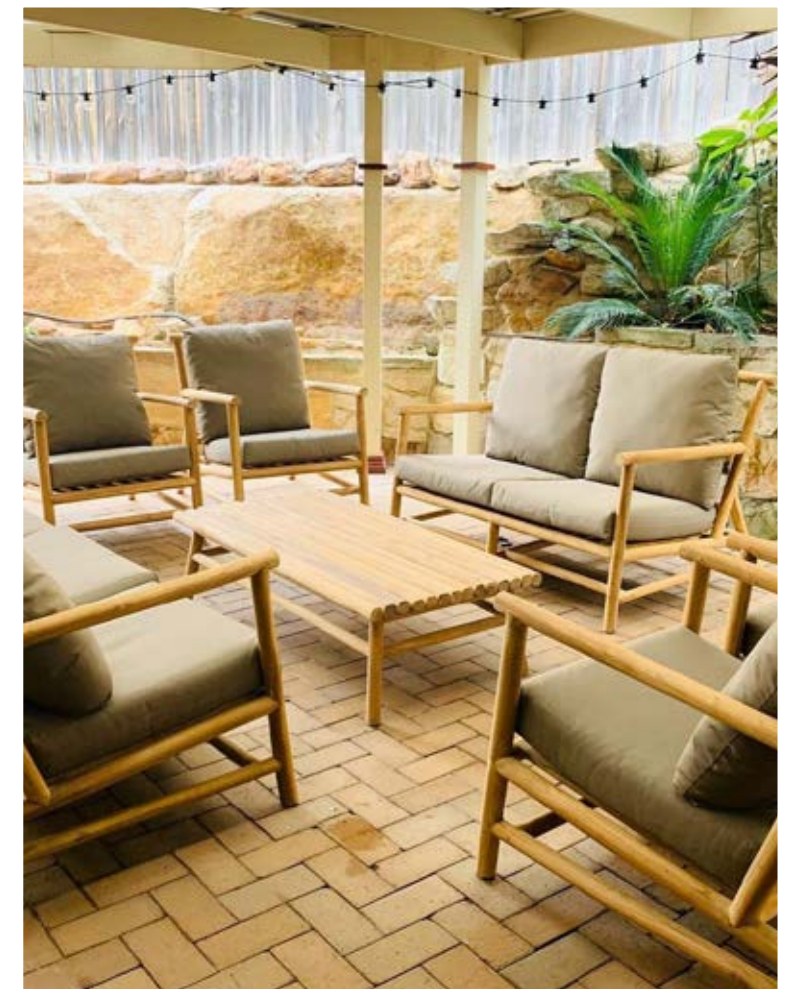

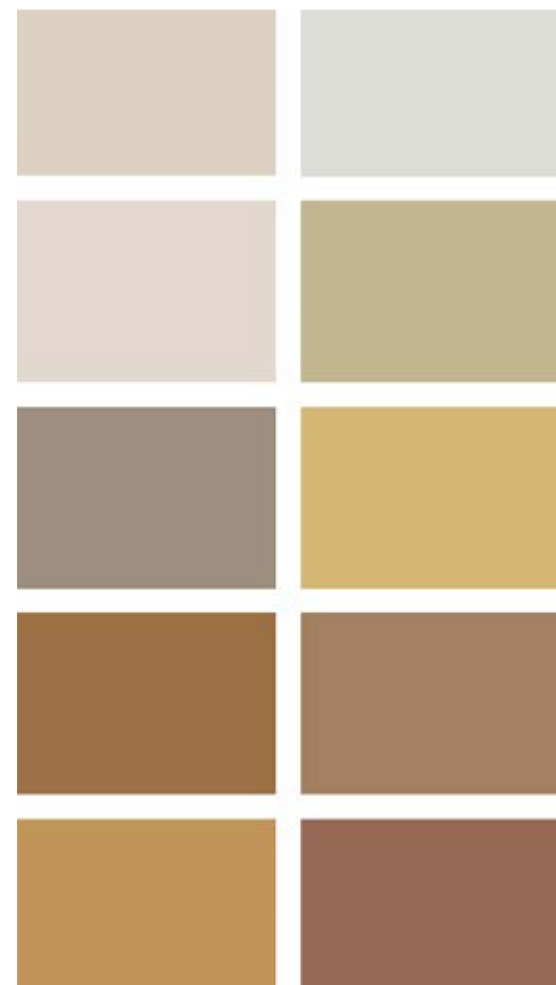

Do you want to keep up with the latest colours of the season? Then Flexa has just what you need. These three colour palettes are the colours of 2021, and we are big fans. The first pallet, 'trust colours', consists mostly of shades of brown and taupe, that range from dark to light. And these colours fit our collections perfectly! You can combine these colours with our Sticks and More collection, Rooty of Twiggy, or the Long Island collection, for example. The pictures to the side contain some inspiration, provided by our customers!

# TIMELESS COLOURS

Timeless warm colours! These colours harmonise perfectly with wooden furniture, but they're also perfect to combine with wickerwork or aluminium, for a more industrial look. In these pictures sent by customers, you can see our Long Island Lounge, adorned with these friendly colours.

# EARTH COLORS

As the name already implies: these earth colours consist mostly of green, blue and brown, and it makes us feel 'down to earth'. The olive green shades from this palette look very nice with the Olive Lounge. We're also familiar with blueish green shades. In the past, we already had collections in these colours, such as the Pebble Beach modular lounge set. On the picture below on the left side, you can see this beautiful set in Australia, in the colour 'Ocean'! This year, we are following the dark blue shades trend in our latest San Miguel collection.

# WE WANT TO THANK YOU!

Thanks to you, our furniture has a purpose, and a beautiful home to shine in! We promise to put the quality in your quality time, so we hope we have been able to inspire you with this magazine, and most of all we hope that it made you feel good. Are you interested and inspired? On our website, you can check where our collections are available. Always make sure to contact the dealer first, to avoid disappointments. Do you have some nice pictures of your Apple Bee furniture? Don't forget to tag us, or use the hashtag [#applebeedoorfurniture](#) when you upload a picture!
