A COLLECTION FOR THE DESIGN SAVVY.

Ideal Standard's new collection is classy and practical, stylish and efficient. It's thin rims and curved-line items bring an airy feel to any environment; while the exclusive AquaBlade® flushing technology and the wide range of bathroom solutions provide for a highly relaxing and enjoyable space. It's the perfect solution for those who appreciate beauty, comfort and personal style.

DESIGNING OUT OF THIN AIR.

Robin Levien is one of the most successful and innovative product designers in Europe. He became a Royal Designer for Industry in 1995 as well as receiving many awards. His work is in the permanent collection in the Victoria and Albert museum in London. He has been the non Executive Design Director at Ideal Standard since 2003 creating many collections for the brand, including the Studio range - that revolutionised the UK bathroom market - and now the evolution of the Connect range: Connect Air.

"That spark, that special something that connects with people. My work strives to get 'it' into everyday products – that's what I'm interested in."

Robin Levien
Designer

LEVIEN'S TAKE ON CONNECT AIR.

Back in 2009, I predicted that products would get lighter. This trend for lighter design has many roots but one is sustainability, if we use less materials and energy we reduce our

ecological footprint. Advances in technology and engineering have made this 'slimming down' of products possible. It was obvious to me that Connect Air should follow this trend for

lighter design. Our very first sketches were of thin rims and WC bowls with concave sides.

At Studio Levien we design many different kinds of domestic products and are very often inspired by nature.

Plants have to be light and strong and there is much that designers can learn from them. This growing feeling, like a flower is a key design element of the Connect Air line. I like to think

of this 'growing' shape as 'life affirming'. I hope it is the design element of Connect Air that connects with people.

AQUABLADE®

AQUABLADE®
When award-winning technology
and award-winning aesthetics meet.

AQUABLADE®: STYLE & PERFORMANCE.

AquaBlade® is an Ideal Standard exclusive that marks a new era for flushing technologies. Its exceptional performance is only matched by the refinement of its sleek and modern lines. And with excellent technology at its core, the object itself is designed to be beautiful.

With aesthetics and efficiency in mind, Ideal Standard have created a product that answers all the needs a modern lifestyle demands: cutting-edge design with long lasting materials combined with truly effortless and efficient cleaning. As always, a product that is beautiful on the outside and works beautifully on the inside.

* All Connect Air WC's are equipped with AquaBlade®.

Closed-couple bowl with
AquaBlade® technology and
soft close sandwich seat

Wall-hung bowl with
AquaBlade® technology and
soft close sandwich seat

AquaBlade® has a smooth, gently curved surface with no overhanging rim combined with an exclusively engineered system of channels to create a powerful **360° cascading wall of water** from the very top of the toilet bowl.

AquaBlade® rinses 100% of the inner bowl's surface below the rim, it is **unrivalled when it comes to hygiene**. And very effective at flushing with low volumes of water consumption (4,5/3L per flush).

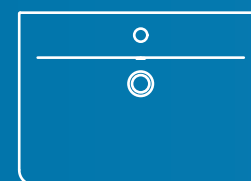

THE LIGHTNESS OF HIGH QUALITY CERAMICS.

Connect Air's ceramics have a contemporary design while remaining timelessly elegant. The toilets, vanities, basins and vessels are all manufactured with care to ensure durability and enhance the pleasure of your everyday experience.

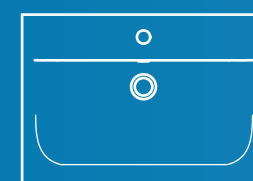

The balance between a solid natural material and the delicacy of Levien's design, result in a pleasant environment that feels light and solid at the same time.

THE LIGHT, THE CURVE, THE CUBE. The ceramics of the Connect Air line are available in three different designs in order to satisfy your personal taste and be in tune with the décor and feeling of your home. Cube, Curve and Arc for the basins and Cube and Arc toilet tanks, Light for the vanities and vessels.

VANITIES

The Connect Air vanities all share a low profile design to bring a fresh and airy feeling to any place. Available in a variety of sizes, they work for any bathroom. Its large deck is made to fit all of your beauty and personal care products, avoiding the impression of an overcrowded space.

VESSELS

The Connect Air vessels have ultra-thin rims, so sophisticated that your elegance will be undeniable. The idea at the conception of the vessel's design was to create a home object with the luxury look of a hotel. Its expressive angles and light, crisp look make the vessels a statement item that can change the whole look of your bathroom.

The Connect Air basins are the reinterpretation of a classic. The angled and low exterior sides, the white ceramics and the graceful lines are combined with the strength of the material and the nature-inspired shapes. The basins are available in different sizes in the Cube, Curve and Arc models for a more personalized result.

TOILETS & BIDETS

The Connect Air toilets and bidets not only look beautiful but add comfort to your everyday life. Their elegant and curvy design bring an airy element to any room. The wall-hung and back-to-wall WC's feature a completely invisible fixation system that keeps the design clean while hosting the exclusive AquaBlade® technology.

Connect Air's furniture is designed to highlight the soft and curved lines of the ceramics. Its strong and concise shapes and finishing choices give personality to any room, keeping it organized at the same time thanks to the available sizes, drawers and shelves options. All the furniture is wall-mounted making the drawer fronts look like they are floating; this creates an atmosphere that almost feels like the room is suspended in time.
