PREMIUM OUTDOOR FURNITURE

PURCHASE CATALOGUE 2024

## Apple Bee 2024

The Apple Bee purchase catalogue 2024 has been specially compiled for you as a purchaser. It includes compact, clear, and useful information of each collection. All the outdoor furniture shown here, is available per container and most of the items will also be available through our warehouse in Dongen, the Netherlands.

We want to help you as our Apple Bee dealer to make your sales as easy as possible.

In addition to sizes and weights, you will also find information about the fabrics, materials used, maintenance and much more.

All the information you need to properly advise your customer!

Apple Bee can also support you if you are looking for custom made production. We would be more than happy to welcome you in our 400 m2 showroom in Dongen and talk over the possibilities. Hope to get in contact with you soon and wish you a successful season in 2024!

# CERTIFIED TEAK WOOD

At Apple Bee, we value craftsmanship. That is why we work with premium materials, such as teakwood, for many years. We only use certified teak from sustainably managed and controlled plantations. Natural teak has a honey-brown to dark brown colour. Because of its natural oil content teak is the best possible wood for outdoor use. In an outdoor environment the colour will change from honey-brown into a nice silver-grey patina colour. For many people this is the reason to choose a teak product. To keep its natural colour Apple Bee offers several finishes to maintain your products. Beside a teak cleaner and a teak shield, we developed our own products to restore the unique Coastal and Antique colour developed by Apple Bee. An extensive teak care guide on our website explains how to clean and care for your teak product. Scan the QR code to see the teak care guide.

## TEAK CARE

### Apple Bee wood is Earth-friendly

Teak is the best and most valuable thing nature has to offer in terms of wood. We make our teak furniture from wood grown at the plantation forest. This is a big step forward to conserve the nature forests.

Teak contains many natural oils, which serves as a natural protective layer on the wood. Apple Bee already pre-treats all teak furniture with an anti-fungus pesticide during the production, which is designed to kill mould and mildew spores inside teak. For outdoor use, teak furniture will be exposed to rain, sunlight, dirt, moisture and fungi, and therefore taking care of outdoor furniture is important.

### Apple Bee - Teak cleaner

Apple Bee Teak Cleaner is specifically designed to kill mould and mildew spores inside teak. It contains both cleaning and brightening ingredients.

**Article No: OV0010 | EAN: 8718091508382**

### Apple Bee - Teak color restore Antique

Apple Bee Teak Color Restore Antique is specially developed for Apple Bee teak furniture with Antique finish. After a while the Antique color will fade out. The treatment protects teak and helps it retaining its natural warm color. Apple Bee Color Restore Antique generally lasts for the entire season without turning black or gray. The duration depends upon factors such as exposure to sunlight, humidity, rain, the age of the teak, and some other factors.

**Article No: OV0011 | EAN: 8718091508399**

### Apple Bee - Teak color restore Coastal

Apple Bee Teak Color Restore Coastal is specially developed for Apple Bee teak furniture with Coastal finish. After a while the Coastal color will fade out. The treatment protects teak and helps it retaining its natural cool color. Apple Bee Color Restore Coastal generally lasts for the entire season without turning black or gray. The duration depends upon factors such as exposure to sunlight, humidity, rain, the age of the teak, and some other factors.

**Article No: OV0013 | EAN: 8718091516578**

### Apple Bee - Teak shield

Apple Bee Teak Shield slows the growth of algae and fungi and helps to maintain teak's silvergrey color for a long period of time, without getting green deposits. We recommend treating teak with Apple Bee Teak Shield at least once a year. Tabletops should be treated more often, depending on the frequency of use. Extreme green deposit can occur under some conditions, such as exposure to long periods of damp. In this case, it is advisable to apply Apple Bee Teak Shield twice a year.

# PREMIUM POWDER COATED ALUMINIUM

Aluminium is a very lightweight and rustproof material, which makes it perfectly suitable for garden furniture. The material is often used in combination with materials which enhance the properties of the lightweight metal, such as wicker, teak, and rope. But we also have some collections made entirely of aluminium, such as the Delgado Lounge.

We use aluminium for the basic frames of all our furniture, as it is lighter than steel and rust proof. For wickerwork furniture, our Biculair® weaving material is woven around the aluminium frame. We produce these aluminium tubes in-house, so we are unlimited which form and shape of the required profiles. Woven or not, we always powder coat our frames. The UV-resistant powder coating protects the aluminium against all weather conditions.

A close-up photograph of several spools of rope. The spools are arranged in a row, with the most prominent one in the foreground being a vibrant green. To its right, a spool of bright yellow rope is visible. The background shows more spools in various colors, including white and blue, slightly out of focus. The lighting is bright, highlighting the texture of the rope.

## ROPE & BELT

Among other materials, Apple Bee uses 'rope' as a weaving material. This is machine-made rope with a PVC woven core. Durable water-resistant soft fibres which are woven around the furniture frame. So this rope offers the best of both worlds: solid quality with little stretch and a nice soft and comfortable touch. But we also use a combination of rope with belt. The combination of these two weaving materials, resulted in a new weaving structure characteristic for Apple Bee. The round "vertical rope" and the flat "horizontal belt" create an exciting pattern of lines. The way the round "rope" is woven around the frame shows the master's hand. There are several properties that make rope useful for outdoor furniture. It is particularly strong, easy to maintain, durable and dries quickly. The rope we use at Apple Bee is UV-resistant, preventing discoloration by the sun! At Apple Bee, we have been aware for a long time that "rope wicker" is an essential part of today's gardens. That is why we apply this fine material for many years already! As the name suggests, it is garden furniture made of rope. Not just any rope, of course. The rope is specially developed for outdoor use and made to last for years. The "belts" in our furniture can be processed in different widths and are produced of the same durable, and water- and UV-resistant soft Olefin fibres as the Sunproof fabrics used for our cushions. This creates a comfortable piece of furniture, even without adding a cushion. Because of this difference in widths and designs, our designers constantly achieve a completely different look for our furniture.

A close-up photograph of a woven chair. The chair is made of a light-colored, textured material, likely rope or fabric, woven in a complex, repeating pattern. The chair has a wooden leg visible on the right side. The background is a blurred outdoor setting with gravel and some greenery.

## MAINTENANCE ROPE & BELT

Contrary to what many people think, cleaning rope and belt furniture is easy; Firstly remove loose dirt and dust from the furniture using a soft brush or Hoover with a brush nozzle. Make a mild detergent by mixing mild soap with warm water. Dip a soft brush or sponge into the solution and gently scrub the rope surface. Avoid harsh detergents and scrubbing too ROUGHLY as THIS can damage the fibres. Rinse the rope with clean water to remove soap residue. Use a garden hose or a bucket with clean water. Let the furniture air dry or use a clean cloth to dry it off. Make sure the furniture is completely dry before storing or using it. Repeat these cleaning steps regularly, depending on use and exposure to the elements. This will help prevent dirt build-up and preserve the furniture's appearance.

# BEE WETT CUSHIONS®

PREMIUM TECHNOLOGY

Apple Bee furniture is made of the highest quality materials. The same certainly applies to the cushions. Our BEE WETT® range consists of special weather-resistant cushions that you can simply leave outside THROUGHOUT THE SEASON / YEAR. The removable cover is made of the best possible materials, which are all washable. As well as being waterproof, the material is also guaranteed to be UV-resistant. Unlike normal foam, the unique BEE WETT® filling does not absorb moisture. The open fabric structure on the bottom of the cushion drains all moisture perfectly. This ensures that your BEE WETT® cushion dries incredibly quick compared to other cushions. The BEE WETT cushion is upholstered with an Olefin COVER that is resistant to rot and fungus, but is also UV-proof, soft, comfortable and damp-proof. The premium BEE WETT® TECHNOLOGY guarantees the cushions TO dry quickly after heavy rain.

## Care

For many years we have been supplying Apple Bee furniture together with the highest-quality, care-friendly BEE WETT® cushions. One of the surest ways to extend the life of these attractive cushions is to maintain the fabric correctly. This can be done simply by brushing off dirt before it becomes embedded in the fabric fibres and to immediately remove spilled liquids and other substances.

Do not use any caustic cleaning agents or chlorine. You can leave the cushion covers to soak in a soap and water solution and/or wash them in a delicate fabrics programme at a maximum of 30 degrees.

NOTE: always rinse the covers thoroughly! In order to retain the cushions' water-repellent layer you can add a little Harmisol or similar to the last rinsing. Do not put the cushion covers in a spin dryer or dryer and do not iron them. As soon as the

washing machine program is finished, immediately replace the wet cover around the cushion filling so that the natural elasticity of the fibres pull the cover nice and tight around the filling as it dries.

## DRAIN

The open fabric structure on the bottom of the cushion drains all moisture perfectly

A close-up photograph of a wicker basket, showing the intricate weaving of light-colored wicker strips. A thick, natural-colored rope is attached to the top of the basket, serving as a handle. The background is a blurred outdoor setting with green foliage and a wooden deck.

# BICULAIR® WICKERWORK

Apple Bee furniture is entirely handmade. The frame is manufactured from aluminium, with no concessions made in wall thickness or finish. The welds are of first-rate quality, the screws are of high-grade steel, and the frame is anodized in a matt or high-gloss finish, or treated with color epoxy.

A unique feature of the range is that the frames are woven with special Biculair® wickerwork originally developed for professional use. This highly durable imitation rattan fibre (HDPE) is fully weather-resistant, colorfast, recyclable and environmentally friendly. This means that the appearance and performance of the furniture is not affected by the European weather conditions and that the colors retain their natural quality, even better than real rattan! The top-class quality of this wickerwork, tested by the Netherlands Organisation for Applied Scientific Research (TNO), stands out against that of other comparable wickerwork.

## LIGHT WEIGHT CONCRETE (LWC)

Light weight concrete has a core of so-called fibre reinforced cement board. In Europe and in the USA, this is also used for facade panels to decorate exterior walls because of its many advantages. It's very strong, durable, stable and it can withstand the elements water and fire.

Apple Bee has chosen the same base material for its light weight concrete tops, making these tops solid, stable and – unlike other resin materials – Apple Bee LWC tops perform very well under all kinds of weather conditions. The combination of a beautiful design and this quality material ensures that Apple Bee LWC tables provide many years of enjoyment.

# MAXIMISE YOUR MARGIN WITH APPLE BEE'S NEW ONLINE & INSTORE PROMOTION PROGRAMMES

## IN-STORE PROMOTION PROGRAMME

We believe in partnership. That's why we introduce you to our Instore Apple Bee Promotion programme, which provides you the tools that lead to extra margin on our Apple Bee collections. Together with your Apple Bee account manager, you decide which tools to choose and how many different Apple Bee collections to place instore, and your purchase price will be determined accordingly.

To give you an idea: It is already profitable starting with a minimum of 5 showroom sets (4 + 1 newly introduced collection in 2024), and additionally add unique in-store tools to further optimize. This allows you to determine your margin. Personalise your shop environment with the Apple Bee instore tools: dividers, banners and rugs. They show customers where our premium brand is located in your store and clearly explain the Apple Bee USPs. Beautiful and informative visual elements that support your sales staff!

Make an appointment with your Apple Bee account manager to help you put together the best mix for your promotional package.

## IN-STORE PROMOTION TOOLS :

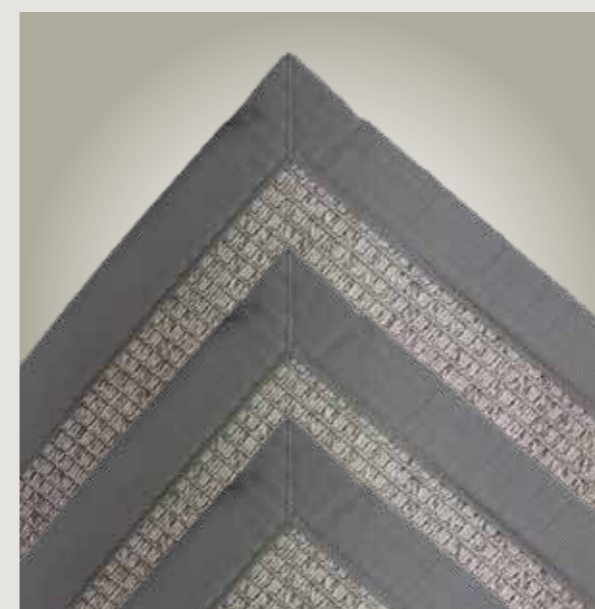

The full teak dividers are a real eye-catcher in every showroom. Add extra (artificial) plants for a stylish, transparent and functional partition between the different sets. The dividers feature a panel to inform the consumer. On one side of the panel, the Apple Bee logo immediately makes it clear where the Apple Bee collections are located and on the other side of the panel, the various USPs of the Apple Bee furniture are made visually clear.

The roller banner gives the sales staff additional guidance regarding the USPs of Apple Bee furniture. The main USPs are depicted with icons and QR codes that lead potential buyers directly to our website and socials for even more information. An indispensable sales support for any Apple Bee dealer!

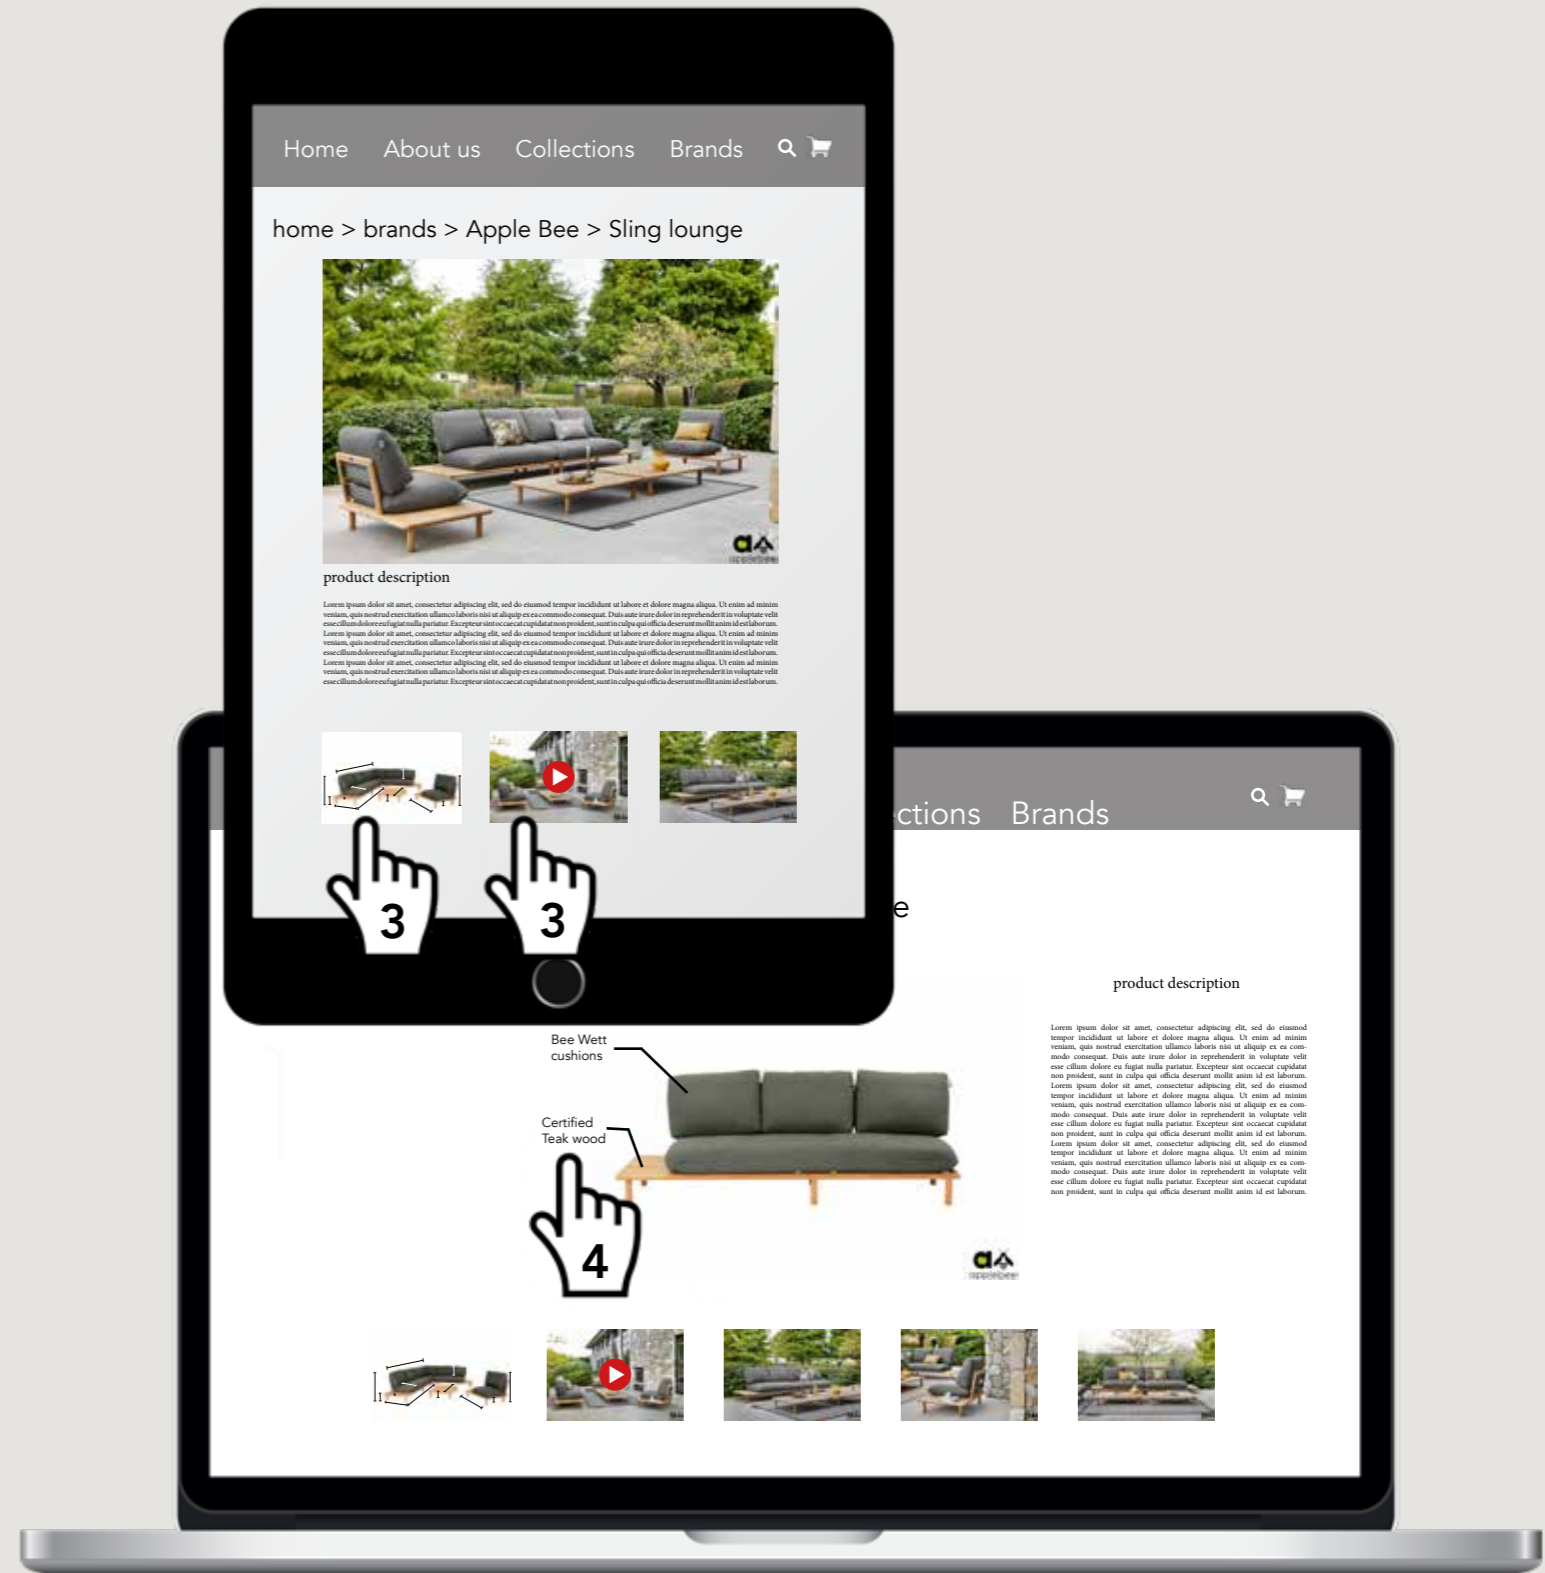

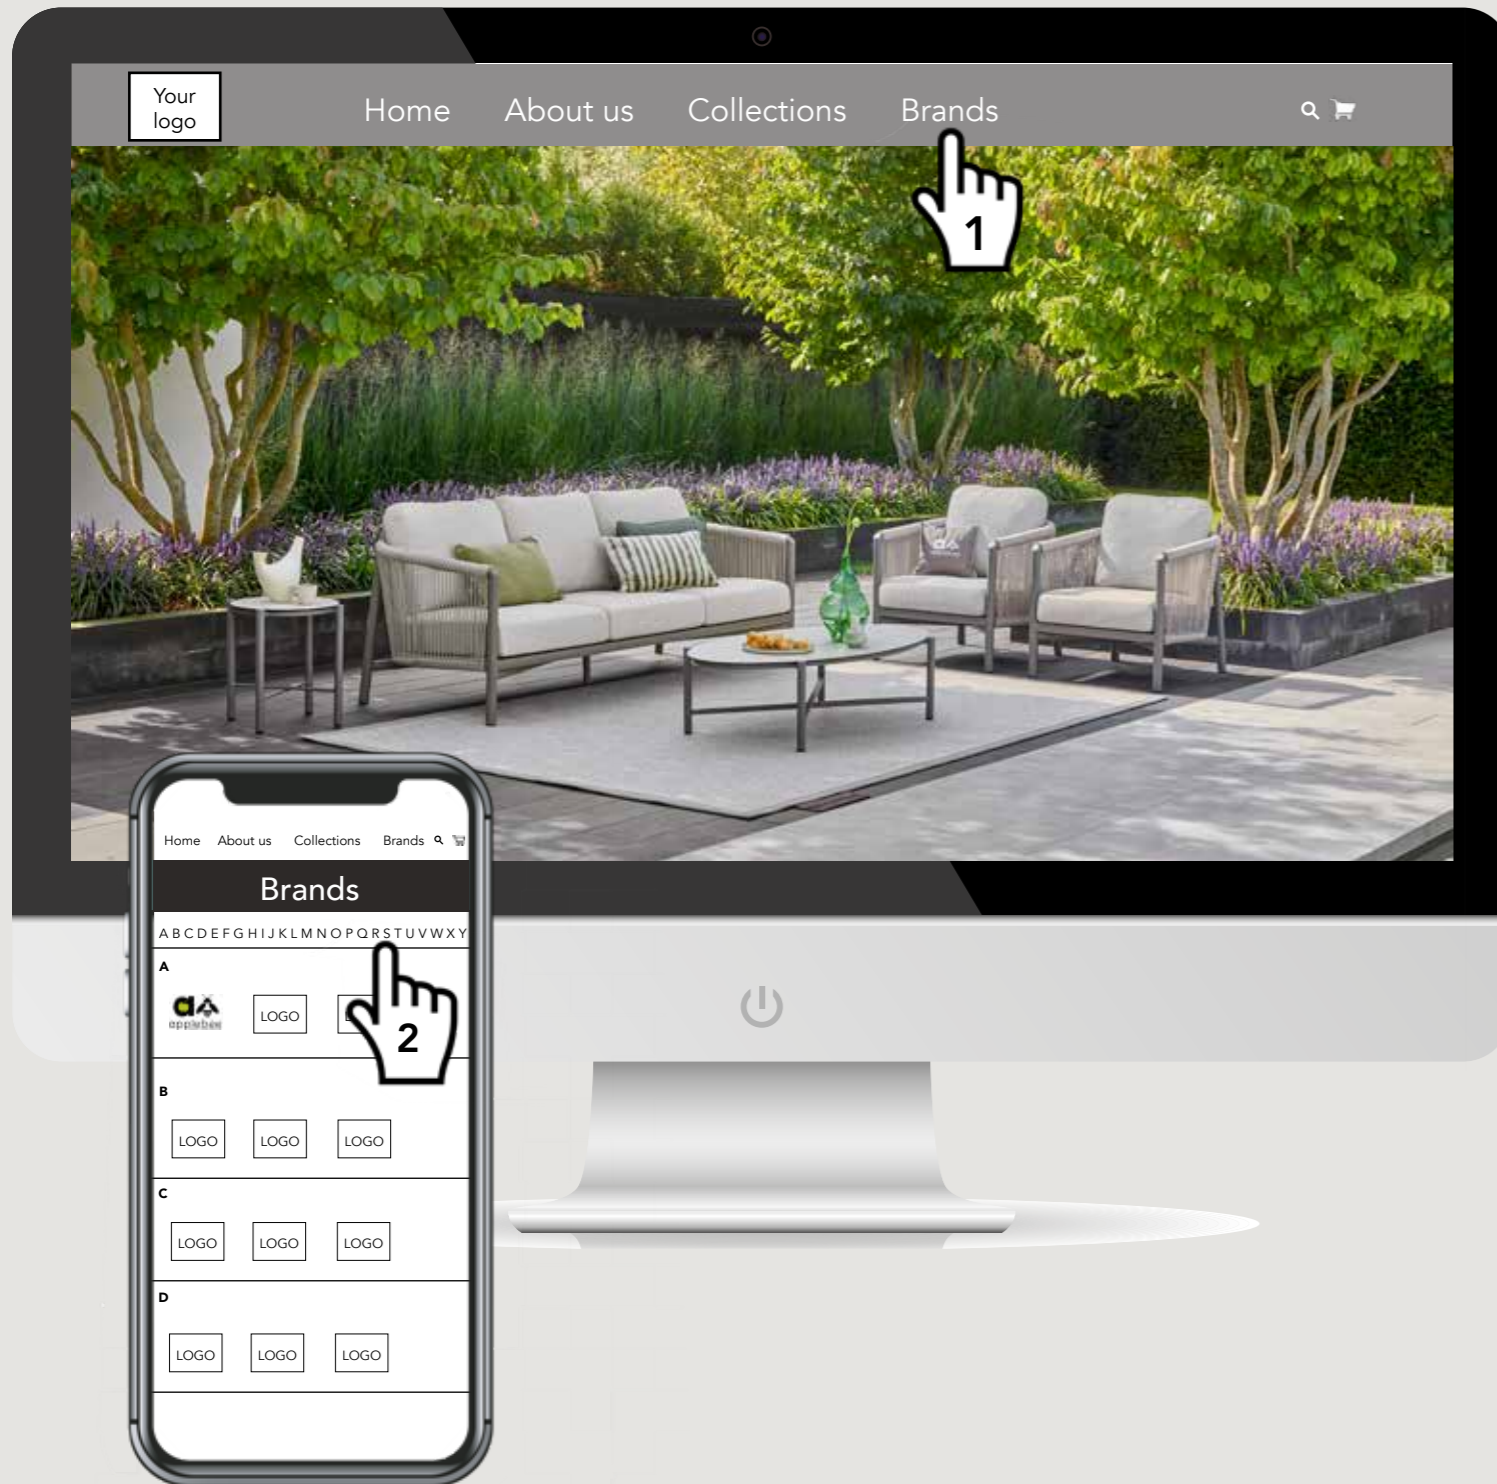

Style the sets in the showroom with a beautiful Apple Bee outdoor rug. An outdoor rug creates warmth and atmosphere and gives each set its own instore section. Feel free to ask us for more information.

# ONLINE PROMOTION PROGRAMME

Also for online shopping, our Apple Bee online promotion programme gives you tools to maximise your margin with Apple Bee collections. This programme is structured in different parts, just like our in-store promotion programme. The following pages explain step by step exactly how it works. Would you also like to maximise your margin with Apple Bee collections, please contact your Apple Bee account manager to discuss the possibilities. We will be more than happy to assist you!

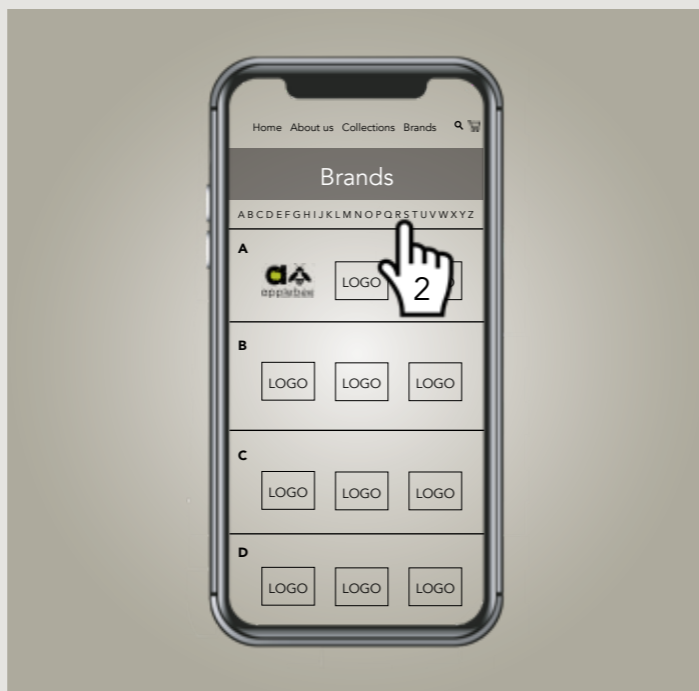

On your mainpage there is 'brand section'

When you get to the product page, we prefer that the slides are containing the sizes being shown with lines. And as the second slide we prefer a video

When you click on 'brands' the brands will be preferable shown in alphabetical order

And at last Apple Bee's USP'S must be highlighted such as:

# WARRANTY

Our garden furniture is covered by a 3 year warranty, which extends to material and manufacturing defects, under normal usage. The warranty excludes:

- Damage through use;
- Scratches;
- Stacking damage;
- Loosening / detachment of plaited strands;
- Fine cracks in wood;
- Turning grey / discoloration of wood;
- Standard cushions.

Defects that are the result of incorrect or improper use (for example: abnormal loads, damage from aggressive substances, incorrect assembly or maintenance, repairs by non-experts, etc.) are also excluded. This warranty does not entitle the purchaser to compensation. Any claims or warranty should be made through the supplier, on presentation of the sales receipt. For more information and practical tips on the warranty and maintenance, visit [www.applebee.nl](http://www.applebee.nl) or email: [service@applebee.nl](mailto:service@applebee.nl).
